Introduction	7
Jon Moorhouse Keystone Law	
I. Energy joint ventures: upstream	11
Jon Moorhouse Keystone Law	
1. Exploration	12
1.1 Data acquisition	12
1.2 Data processing and interpretation	14
2. Production	16
3. End of field life	22
4. Intellectual property management	22
II. A downstream perspective	25
Maeve O'Flynn Finnegan Europe LLP Paul Townsend Finnegan LLP	
1. Process technology	25

1.1	How can process technology be protected?	26
1.2	What protection is offered by process patents?	26
1.3	In which circumstances will competitor activity be outside the scope of protection of your process patent?	27
1.4	How do you ensure that the claims of your process patent provide commercially useful protection?	30
1.5	Will you be able to prove infringement of your process patent?	32
1.6	What is the value of your process patents?	32
2.	Differentiated products	35
2.1	How should I protect products resulting from collaborative development?	35
2.2	How do I protect innovative products resulting from open innovation?	36
2.3	What are the IP challenges when considering freedom to operate for a large portfolio of differentiated products?	38
3.	Conclusion	40
III.	Renewables: solar – spotlight on BNRG	43
	Eoin Langford BNRG Renewables Ltd	
	Jon Moorhouse Keystone Law	
1.	Introduction	43
2.	Hardware	44
2.1	The technology	44
2.2	Manufacture	47
2.3	Procurement	48
3.	Project development and asset management	49
3.1	Site selection and design optimisation	49
3.2	EPC and partnering	51
4.	Reputation and brand management	52

IV. Digitalisation	55
Charles T Collins-Chase	
Kathryn R Judson	
Paul Townsend	
Finnegan LLP	
1. Digitalisation and artificial intelligence are rapidly changing the energy industry	55
2. Potential intellectual property issues facing AI and digital innovations	57
2.1 Patent eligibility	57
2.2 Patent inventorship	59
2.3 Trade secret protection	60
3. Patents: common issues and strategies	62
3.1 Strategies for overcoming patent-eligibility challenges	62
3.2 Strategies for avoiding inventorship issues	66
4. Trade secrets: strategies for navigating common pitfalls	67
5. Conclusion	71
V. Standard essential patents: licensing challenges for energy companies	75
Robert Pocknell	
Keystone Law	
1. Standards in the energy industry	76
1.1 Smart meters	76
1.2 Autonomous driving	77
1.3 Electric vehicle charging	77
2. What is the standards-setting process?	77
3. What SEP issues arise in the standards-setting process?	79
4. What does FRAND (fair, reasonable and non-discriminatory) mean?	80
5. Why are these telecoms issues relevant to the energy industry?	83
5.1 Example: a 'smart' water flow meter	84
6. What can be done?	86

- VI. Brand protection** 89
 - Sean Ibbetson**
Bristows LLP
 - 1. Introduction: the value of brands in the energy sector** 89
 - 2. How the energy sector protects its brands** 90
 - 2.1 Trademarks (registered) 90
 - 2.2 Trademarks (unregistered) 97
 - 2.3 Designs (registered and unregistered) 99
 - 2.4 Copyright 100
 - 3. Enforcement issues: jurisdiction, remedies and online enforcement** 101
 - 3.1 Jurisdiction 101
 - 3.2 Remedies 101
 - 3.3 Online enforcement issues 103
 - 4. Advertising disputes** 106
 - 5. Conclusion** 106

- About the authors** 108

- About Globe Law and Business** 112
